

The UK Premium Class Bearing Manufacturer

BUT (Roulement, Kugellager, Bearing) is the UK bearing manufacturing organization which has been operating in the bearing in dustry for over 70 years, with a monthly production capacity exceeding 350 tons of machined steel. The experience gained over the years provides BUT with the expertise necessary for the development and manufacture of technological industrial bearings up to 1925 mm outer diameter. BUT offers reliable cost effective solutions, extreme operational flexibility, leading-edge service, huge stock availability, short delivery time and the high, consistent quality of a premium class bearing manufacturer.

With a worldwide distribution network and exports to more than 50 countries, BUT is globally recognized as "The Alternative Power" in the bearing industry.

BUT Tapered Roller Bearings

The tapered roller bearings (TRBs) manufactured by BUT are engineered to withstand combined radial and thrust loads. Available in a rich portfolio of designs and sizes, in standardized and non-standardized dimensional series, BUT tapered roller bearings can be in metric or inch measurements and represent the state of the art. Manufactured from high hardness materials, featuring unparalleled fatigue strength and resistance to wear, BUT TRBs provide excellent performance even under severe operating conditions.

BUT's single row, matched pair, double and four-row tapered roller bearings are optimized to ensure increased load carrying capacities and high stiffness in special applications. BUT Bainite Hardening Treatment (HB) and High Temperature Dimensional Stabilization (S) can be applied on bearing rings and rollers.

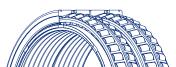

Four-Row Tapered Roller Bearings

BUT four-row tapered roller bearings (FRTRB) are produced mainly in TQO and TQI configuration, in open and sealed version. Supplied with the required axial internal clearance (BEP), they are mainly employed on work rolls of rolling mill applications.

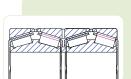

The use of high quality raw materials, special heat treatments, and innovative sealing solutions are at the base of their higher operating reliability and longer service life expectancy. The bearing dimensional and running accuracy conforms to ISO/ABMA/GOST specifications.

Main Designs

TQO type

- Three ribless outer rings (one double cup, two single cups) plus two cup spacers (plain or with lubrication grooves and holes)
- Two inner rings with three ribs (two double cones) plus one cone spacer (plain or with
- Four one-piece window type steel cages
- Supports radial and axial loads in both directions
- Preset or adjusted BEP on customer's request
- Available with helical groove in the bore (G)
- Marked zones on cups side face to facilitate mounting and maintenance operations
- Available in metric and inch sizes

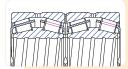

TQO NO SPACER/G type

- Three ribless outer rings (one double cup, two single cups)
- Two inner rings with three ribs (two double
- Four one-piece window type pressed steel cages
- Supports radial and axial loads in both directions
- Preset or adjusted BEP on customer's request
- Available with helical groove in the bore (G)
- Lubrication grooves in double cone side
- Marked zones on cups sides face to facilitate mounting and maintenance operations
- Available in metric and inch sizes

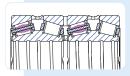

TQOS/AVS2/G type

TQO PIERCED/G type

- Three ribless outer rings (one double cup, two single cups) plus two cup spacers (plain or with lubrication grooves and holes)
- Two inner rings with three ribs (two double cones) plus one cone spacer (plain or with lubrication holes)
- Four two-piece steel pin type cages
- Pierced roller execution to increase load capacity
- Preset or adjusted BEP on customer's request
- Available with helical groove in the bore (G)
- Marked zones on cups side face to facilitate mounting and maintenance operations
- Available in metric and inch sizes

- Three ribless outer rings (one double cup, two single cups) plus two cup spacers (plain or with lubrication grooves and holes)
- Two inner rings with three ribs (two double cones)
- Four one-piece window type steel cages
- Preset or adjusted BEP on customer's request
- Marked zones on cups side face to facilitate mounting and maintenance operations
- Lateral flanges with lip seals and o-rings on bearing both sides
- Designed with Anti-Vortex System cone spacer seal set
- Available in metric and inch sizes

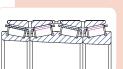

- Two ribless outer rings (two double cup) plus one cup spacer (plain or with lubrication grooves and holes)
- Three inner rings with side ribs (one double cone, two single cones)
- Four one-piece window type steel cages
- Preset or adjusted BEP on customer's request
- Available with helical groove in the bore (G)
- Available with cylindrical (TQI) or tapered bore (TQIT)
- Marked zones on cups side face to facilitate mounting and maintenance operations
- Available in metric and inch sizes
